

Glutathione LPT is a potent, highly bioavailable tripeptide that delivers vital antioxidant, anti-inflammatory, and anti-aging support to the body.

Glutathione, a master antioxidant, helps the body flush pesticides, heavy metals, food additives, and industrial pollution. This supports the immune system and catalyzes mitochondrial energy production, which is essential for healthy neurological and cardiovascular function. Additionally, this nutraceutical promotes anti-aging and anti-inflammatory effects by restoring your body's glutathione levels, which naturally decline with age.

Delivered as a professional-grade chewable nutraceutical tablet, Glutathione LPT harnesses liposome platform technology (LPT) for enhanced absorption and durability.

RECOMMENDED FOR

- Managing oxidative stress
- Liver detoxification
- Boosting immune system function
- Counteracting the negative effects of aging
- Neurological and cardiovascular support
- Optimizing health and vitality

ABOUT THE FORMULA

Glutathione is one of the body's most powerful protective antioxidants. It is synthesized in every cell and found most abundantly in the liver, spleen, eyes, pancreas, and kidneys. A tripeptide made from three amino acids—cysteine, glycine, and glutamine—glutathione is considered the master antioxidant.

Research suggests there may be a link between a low supply of this free radical-fighting tripeptide and age-related ailments, such as glaucoma and macular degeneration. Likewise, studies suggest glutathione may support reduced inflammation, as well as enhanced immune, cardiovascular, cognitive, gastrointestinal, and liver function. In this way, supporting and replenishing glutathione levels can have a profound impact on vitality and disease resilience.

Glutathione has a very low bioavailability in humans when administered orally due to the degradative power of enzymes in the gut, also known as the "first-pass effect." Glutathione LPT, administered via chewable liposomal tablets, enhances patients' therapeutic experience by circumventing the first-pass effect, allowing for more efficient delivery of active compounds and improved efficacy.

SUPPLEMENT FACTS

Serving Size: 2 chewable tablets

Amount Per Serving

(S-Acetyl)-L-Glutathione 30 mg, Liposomal
Proprietary Blend (LPT™) 1800 mg.

Other ingredients: Silicon Dioxide, Magnesium Stearate.

WARNING: If pregnant or nursing, consult your healthcare practitioner before taking this product.

DISCLAIMER

The information provided is for educational purposes only and has not been reviewed by the U.S. Food and Drug Administration.

SUGGESTED USE

As a dietary supplement, chew and swallow 2 tablets daily or as directed by a healthcare practitioner.
